

Neste NExBTL Control Centre

1 Tuas South Lane

Project Information

Client: Neste Singapore Pte Ltd

Development Type: Industrial

Project Size (sqm): 3,475

Year Completed: 2009

Product Description

Access Floor:

Microtac MFS 1500 All Steel with Cementitious Infill Panels (HPL Finish)

Understructure:

Rigid Grid Bolted Stringer with Corner Lock

Floor Height (mm):

1200

Project Description

The Neste NExBTL plant is the world's largest biodiesel plant that produces clean and renewable diesel. Located in the Tuas Industrial Zone, the facility is capable of producing 800 million tonnes of biodiesel per year.

To ensure a smooth production and logistics flow, various monitoring and production equipment is necessary to coordinate the daily activities in the plant. It is thus imperative for the floor system to be sturdy enough to support the equipment in the control centre.

After understanding our client's needs, we were able to recommend a suitable access floor solution and completed the installation project expeditiously.
