

# JTC nanoSpace

11 Tampines Industrial Crescent

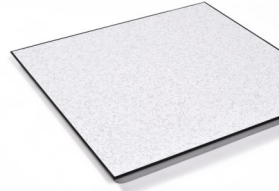

## Project Information

**Developer:** JTC Corporation

**Development Type:** Industrial facility

**Project Size (sqm):** 958

**Year Completed:** 2016

## Product Description

### Access Floor:

Microtac MFS 1500 All Steel with Cementitious Infill Panels (HPL)

### Understructure:

Rigid Grid Bolted Stringer

### Floor Height (mm):

1000

## Project Description

JTC nanoSpace @ Tampines is a ready-built facility which features shared common utilities that enables companies in the semiconductor industry to quickly set up and start their manufacturing activities at a reduced operational cost.

Microtac Systems was tasked to supply and install the access floor system for the FCC room located on the 1st level and also the common utility access areas on the 2nd to 4th level of the development.

Through the process, we amply demonstrated our strengths in providing a one-stop access floor solution to our client and completed the project expeditiously.
