

Singapore LNG Terminal

6 Meranti View (Jurong Island)

Project Information

Owner: Singapore LNG Corporation Pte Ltd

Development Type: Industrial

Project Size (sqm): 1,200

Year Completed : 2013

Product Description

Access Floor:

Microtac MFS 1000 All Steel with Cementitious Infill Panels (HPL Finish)

Understructure:

Rigid Grid Bolted Stringer

Floor Height (mm):

600

Project Description

The liquefied natural gas (LNG) import terminal is an open-access multi-user hub that is capable of importing, reloading, regasification and storage of LNG for trading and distribution in the Asia-Pacific region.

Key facilities such as the control building and fire safety building, are expected to house many monitoring and sensory equipment to ensure the smooth running of the terminal.

Microtac Systems was selected to provide the access floor for the various facilities. We were able to provide a high performance solution that meets our client's needs in an expeditious manner.
